

NGUYEN NGOC TAI

FULLSTACK - WEBSITE DEVELOPER

Experienced **Fullstack WordPress Developer** with experience delivering scalable **eCommerce** and **multi-industry websites**. Specialized in **WordPress backend development**, custom hooks, plugin creation, API integrations, and WooCommerce optimization — ensuring both functionality and business impact. Strong foundation in **HTML5, CSS3, and JavaScript**, ensuring responsive UI and seamless user experience. Applied **technical SEO** principles to enhance site performance and search visibility. Proficient with **Git, Docker**, and **Agile/Scrum** workflows, utilizing **AI-assisted tools** (Copilot, Claude) to improve code efficiency and accelerate delivery. Currently expanding knowledge in **Next.js and Typescript**, with hands-on practice developing frontend interfaces and backend API routes (Redux-Saga, component state management) using **Node.js environment**. While still growing proficiency, actively applying these technologies in freelance projects to strengthen fullstack development expertise.

SKILL

Technical Skills

- CSS 3 (5 years)
- Git (5 years)
- HTML5 (5 years)
- Responsive Design (5 years)
- Custom post type (4 years)
- Wordpress core (4 years)
- AI Tools (3 years)
- Docker (3 years)
- JavaScript (3 years)
- MySQL (3 years)
- NodeJS (3 years)
- OOP (3 years)
- PHP (3 years)
- RESTful (3 years)
- Technical SEO (3 years)
- Bitbucket, GitHub (2 years)
- GSAP (2 years)
- TailwindCSS (2 years)
- MUI (< 1 year)
- NextJS (< 1 year)

Soft Skills

- Self-management
- Problem-solving & Critical thinking
- Teamwork & Collaboration
- English Communication
- Agile/Scrum

WORK EXPERIENCE

- 03/2025 - Now
Freelance Developer – Voting crypto project - API restfull & Frontend (Next.js) at Vitech company
Developing a **frontend web application** for a crypto voting project and analytics platform using **Next.js**, focusing on performance, scalability, and interactive UI.

EDUCATION

Additional Learning

Myself

11/2024 - Now

Continuing self-learning in Next.js, React.js, Typescript and modern frontend development with AI tools (GitHub Copilot, Claude AI, ChatGPT). Completed online courses in WordPress Development, JavaScript ES6+, and Web Performance Optimization.

COLLEGE OF TECHNOLOGY, THU DUC

College - Information Technology - Web Developer

08/2012 - 11/2015

Specialized in software engineering and web development, focusing on PHP, MySQL, HTML/CSS, and JavaScript fundamentals. Built foundational knowledge in full-stack web technologies and teamwork on academic projects.

CERTIFICATE

IELTS

IDP

Built application architecture with **Next.js (App Router)** and implemented **state management** using **Redux + Redux-Saga** for async data flow, side effects, and API handling.

Created **reusable, modular components** and optimized rendering performance through memoization and dynamic imports.

Designed responsive interfaces with **TailwindCSS, Framer Motion, GSAP** animation and **MUI (Material UI)** for seamless user experience and fluid animations.

Integrated backend logic via **Next.js API routes**, handling data fetching, authentication, and server-side validation.

Collaborated with designers to convert **Figma prototypes** into production-ready UI with a focus on accessibility and clean code structure.

Applied **AI-assisted tools** (GitHub Copilot, Claude) to accelerate component generation, logic handling, and refactoring during development.

Key Achievements:

- Built a full frontend stack integrating Redux-Saga with API logic for real-time data flow.
- Designed a modular UI library with reusable components for faster feature iteration.
- Strengthened understanding of **React ecosystem, TypeScript, and Next.js SSR/SSG** workflows through hands-on project implementation.

Technologies:

Next.js, React, TypeScript, Redux, Redux-Saga, TailwindCSS, MUI, Framer Motion, GSAP, Axios, REST API, GitHub Copilot, Claude, Figma.

● 04/2020 - 02/2025

Fullstack WordPress Developer – eCommerce at TNHH Forix (web Sài Gòn)

Worked in environment following **Agile/Scrum** methodology with **Jira** for sprint management and collaborative planning.

Specialized in **backend WordPress development**, including theme/plugin creation, business logic, and REST API integration. Built scalable backend systems for **eCommerce and multi-industry projects** serving international clients.

Developed **custom WordPress functionalities** using **hooks, filters, and PHP functions**, extending core WordPress architecture to meet complex client requirements.

Created **modular plugin frameworks** and reusable components to improve maintainability and speed up delivery across multiple projects.

Focused on **WooCommerce customization**, implementing advanced pricing, checkout automation, CRM and ERP integrations, and performance optimizations for high-traffic stores.

Used **Git-based CI/CD pipelines with Docker** for deployment across local, staging, and production environments.

Applied **AI-assisted development tools** (GitHub Copilot, Claude) to optimize coding workflows, refactor legacy code, and accelerate development timelines.

Collaborated with UI/UX and front-end teams, integrating designs using

English (Intermediate)

TailwindCSS, Bootstrap 5, and GSAP animations for dynamic user experiences.

Worked in **Ubuntu Linux environment** with strong command-line and containerization practices.

Key Achievements:

- Led backend development for **10+ enterprise WordPress/WooCommerce platforms**.
- Increased backend efficiency by **35%** through modular plugin structures.
- Reduced API response time by **50%** with optimized database and caching layers.

Technologies:

WordPress Core (Hooks, Filters, Actions), WooCommerce, PHP, MySQL, REST API, ACF, Git, Docker, Jira, TailwindCSS, Bootstrap 5, GSAP, Figma, Ubuntu, AI Tools (GitHub Copilot, Claude).

● **06/2018 - 03/2020**

Wordpress Web Developer at TNHH KIEMA

- Developed and maintained custom **WordPress** and **Laravel** websites for corporate and eCommerce clients, ensuring stable performance and security.
- Built and customized **WordPress themes and plugins**, including WooCommerce functionalities and custom post types tailored to business requirements.
- Optimized WooCommerce product detail pages with additional product specifications and interactive components to enhance user experience.
- Collaborated with content, design, and marketing teams to plan and publish optimized website content aligned with brand identity.
- Managed and configured hosting environments (**cPanel, Plesk, DirectAdmin**) including website deployment, SSL setup, and routine backups.
- Participated in **code reviews, troubleshooting, and performance tuning**, ensuring scalable and maintainable source code.
- Contributed to the development of multiple software projects, improving overall functionality.
- Utilized various programming languages and frameworks to optimize system performance.
- Engaged in problem-solving activities to address technical challenges in projects.
- Implemented effective coding practices to ensure high-quality software delivery.

Key Achievements:

- Delivered and maintained **10+ custom WordPress websites** for clients in various industries.
- Improved website load speed and SEO performance through code optimization and plugin customization.

Technologies: WordPress, WooCommerce, Laravel, PHP, MySQL, HTML, CSS, JavaScript, cPanel, Plesk, DirectAdmin.

● 06/2015 - 10/2016

Web Developer at WEBSITE DEVELOPER - ESC COMPANY

Main responsibilities:

- Start using and familiarize yourself with website programming
- Design website according to customer's needs
- Use open source Wordpress to customize and create a new theme and build a complete website
- Learn and hone more advanced HTML CSS knowledge

Recognition and Gains:

- Advanced in programming
